IN THE CLAIMS:

Please amend the claims as follows:

1. (previously presented) An accessory for a vehicle having a wheel with spokes, said accessory comprising:
 - a vibratory member configured to be vibrated by the spokes of a rotating wheel; and
 - a main body supporting said vibratory member on said vehicle, said main body further comprising an identity plate;
 - wherein said identity plate further comprises one or more panels bearing identification indicia or decorative elements, said panels being selectively and releasably attached to said main body such that the identification indicia or decorative elements on said vehicle can be changed by replacing a said panel attached to said main body without removing said main body from said vehicle.
2. (previously presented) The accessory of claim 1, wherein said identity plate bears identification numbers.
3. (original) The accessory of claim 2, wherein said numbers are stickers.
4. (original) The accessory of claim 1, wherein said vibratory member snaps into a socket on said main body.

5. (currently amended) The accessory of claim 4, wherein said socket comprises inner and outer rings; and wherein flexible tabs on said vibratory member comprises a round base that is ~~are~~ configured to snap fit between said inner and outer rings of said socket.

6. (previously presented) An accessory for a vehicle having a wheel with spokes, said accessory comprising:

a vibratory member configured to be vibrated by the spokes of a rotating wheel; and
a main body supporting said vibratory member on said vehicle, said main body further comprising an identity plate;

wherein said vibratory member is configured to snap into a socket on said main body at any of a variety of angles with respect to said main body so as to accommodate differently sized bicycles.

7. (original) The accessory of claim 6, further comprising notches disposed around a periphery of said socket for receiving tabs disposed around a periphery of said vibratory member, said notches corresponding to said variety of angles.

8. (original) The accessory of claim 1, wherein said accessory comprises three points at which said accessory is attached to a bicycle.

9. (original) The accessory of claim 8, wherein each of said points comprises a zip tie threaded through said main body.

10. (previously presented) An accessory for a vehicle having a wheel with spokes, said accessory comprising:

a vibratory member configured to be vibrated by the spokes of a rotating wheel; and
a main body supporting said vibratory member on said vehicle, said main body further comprising an identity plate;

wherein said main body comprises an attachment point comprising a plurality of holes disposed around a periphery of a protrusion such that a zip tie can be threaded through said holes at a plurality of angles with respect to said main body.

11. (original) The accessory of claim 1, further comprising a zip tie threaded through said main body for attaching said accessory to said vehicle.

12. (original) The accessory of claim 1, wherein said identity plate comprises one or more removable panels attached to said main body.

13. (original) The accessory of claim 1, wherein said vibratory member comprises a base and a flexible extension, wherein said flexible extension is split into two or more portions.

14. (original) The accessory of claim 13, wherein said splits are tapered, narrowing toward said base.

15. (previously presented) The accessory of claim 13, wherein a corner of one or more of said portions is rounded.

16. (original) A packaged kit comprising:
an accessory for a vehicle having a wheel with spokes, said accessory comprising;
a vibratory member configured to be vibrated by the spokes of a rotating
wheel; and
a main body supporting said vibratory member on said vehicle, said main
body further comprising an identity plate; and
a variety of identification indicia or decorative elements that can be selectively disposed
on said identity plate.

17. (original) The kit of claim 16, wherein said variety of identification indicia or
decorative elements comprise a sheet of stickers.

18. (original) The kit of claim 16, wherein said variety of identification indicia or
decorative elements comprise numbers.

19-20. (cancelled)

21. (new) The accessory of claim 1, wherein said vibratory member is separate from
said one or more panels being identification indicia or decorative elements.
